

FACTS ABOUT MEXICO LAID BEFORE SENATORS BY LANSING

With Secretary Tumulty late last night regarding the conference and said it was not necessary that the President see the Senators immediately, but the President decided to have the conference today. This indicates that the President is eager to settle the Mexican situation and shows his improved condition, according to White House officials.

MRS. WILSON AND GRAYSON CONSENT TO VISIT.

The request of Senator Hitchcock that the President see the Senators was referred to Mrs. Wilson and approved of the conference was given by Rear Admiral Grayson, the President's physician.

The Senators went to the White House after the President's cabinet had held a special meeting at which the Mexican situation was discussed. The Cabinet meeting was called to-day by Secretary Lansing, who spent nearly two hours before the Foreign Relations Committee yesterday discussing the Pull and Hitchcock resolutions regarding the Mexican question generally.

In addition to Mexican affairs the Cabinet discussed the coal situation during its session of two and a half hours, but none of the departmental heads would make a statement when the meeting adjourned. Fuel Administrator Garfield and Director General Hines of the Railroad Administration were present for a time.

The Foreign Relations Committee will not meet until Monday to receive the report of the Senators as to the President's views on the Mexican question.

Immediately after arrangements were made for the conference, Senators Fall began assembling the evidence on which his charge against the Mexican Government representatives was based and preparing an abstract for presentation to the President.

The entire status of relationship between Mexico and the United States was based before the committee and past proceedings were disclosed which heretofore had been held in confidence by the State Department. Secretary Lansing was understood to have told the committee that the Administration had adopted within recent months a more vigorous policy toward Mexico in demanding protection of American lives and property in the southern republic.

LANSING IS OBLIGED TO HASTY ACTION.

He is said to have added that precipitate action by Congress probably would embarrass the State Department in its present negotiations and advised postponement of Congressional action until the latest note and discussed his attitude toward the United States.

MEXICO GETS AIRPLANES AND PILOTS FROM GERMANY

WASHINGTON, Dec. 5.—Mexico has twenty-four war type airplanes mobilized at Chihuahua City alone, and is obtaining additional planes from Germany according to War Department information given to the Senate Military Committee to-day by Gen. Mitchell, Chief of Operations of the Army Air Service.

The Government also has information, Gen. Mitchell said, that former pilots of the German Army are arriving in Mexico for service in the army air forces there.

The United States, Gen. Mitchell said, has produced practically no aerial war equipment since the armistice and consequently is not capable of meeting any first class power in the air to-day.

MEXICANS KILL 927 OTHER THAN AMERICANS

WASHINGTON, Dec. 5.—The President to-day sent to the Senate in response to a resolution adopted last June, a report from Secretary Lansing that 927 citizens of countries other than the United States had been killed in Mexico since the overthrow of Porfirio Diaz. More than one-third of those killed were Chinese.

The report also recently made to the Senate on the number of Americans killed in Mexico.

Major Gen. Hay to Command Part of Border Army.

WASHINGTON, Dec. 5.—Major Gen. William H. Hay has been ordered to take command of the Brownsville district in Texas, the War Department announced to-day.

ALL SCHOOLS MAY EXTEND XMAS VACATION 2 WEEKS

WASHINGTON, Dec. 5.—Fuel Administrator Garfield returned to Washington to-day to take personal charge of the coal situation. Both he and Director General Hines attended the Cabinet meeting.

The Fuel Administration, it is unofficially reported to-day, is considering asking Governors of all States to arrange a two weeks' vacation for the schools, to follow the regular Christmas recess, as a fuel conservation measure.

Dr. Garfield said coal production was getting closer to the normal, although the stringency in the Middle West was acute.

The Executive Committee of bituminous coal operators to-day issued a statement declaring reports from Chicago that the operators of the central competitive field were considering a 25 per cent. advance to the miners and an advance in price of coal of about 20 cents a ton to consumers "absolutely without foundation."

"There will be no further offer to the miners. The final word has been said," the statement concluded.

QUICK ACTION NEEDED.

When the strike takes place, the situation will be serious.

VIRGINIA MINERS SWEAR BY KEENEY, PATRIOTIC LEADER

His Refusal to Fight Against U. S. Sends 13,000 Men Back to Pits.

CHARLESTON, W. Va., Dec. 5.—The successful efforts of C. Frank Keene, President of District 17, United Mine Workers of America, to bring about a reconciliation between the soft coal miners and operators at the Fairmont Fields of West Virginia make him the first man in the United States to cause the first big break in the strike.

That Keene was averse to settling the coal dispute by means of a strike was evident from the address delivered before the miners' convention in Fairmont on Wednesday, when he placed before the men the proposition of the Government granting a wage increase of 14 per cent. The result was that 13,000 miners, comprising 125 local unions, voted to return to work.

Since the strike order became effective Nov. 1 he has spent the majority of his time with the men, urging them to be loyal to their union and at the same time conduct themselves as clean American citizens. He took an active part in having the strike order obeyed in his district until the Federal injunction was served. Returning from one of his trips, he characterizedly remarked:

"I won't fight the Government. If it says the strike must be discontinued, I will no longer use my influence to have the men remain away from work."

The 14,000 union miners in District 17 consider Keene's word law, and it was his influence over the men that has averted a crisis on more than one occasion. When the armed march of thousands of miners started from the Kanawha fields to Logan County to force unionization of the Guyan mines early in September, it was Keene who detained them at the very border of Logan County. Only a few hours before, Gov. John J. Cornwell had personally addressed the men and threatened to stop the invasion with Federal soldiers. The Governor left the big mass meeting in the mountains and the miners, paying no heed to his warning, started on their march before day-light.

While the march was in progress both Keene and the Governor kept in close touch with the men and almost hourly conferences were held between the two. As a last resort Keene was dispatched as a special representative of the Governor to overtake the march and bring them back to Kanawha County. His efforts were successful.

Keene has co-operated in every instance with the Governor during the strike, and at no time has any disorder been reported from the coal fields. At times some of the uneducated miners were influenced to some extent by radicals and by communist propaganda circulated in the mountainous sections and trouble was threatened, but the situation was kept well in hand by the district chief.

It was not until recently that Keene announced that he had broken off diplomatic relations with Gov. Cornwell, brought about, Keene said by the Governor's attitude toward a proposed Congressional investigation of the alleged unbearable conditions in the Logan fields.

BIG CUT IN TRAINS IS ORDERED HERE TO CONSERVE COAL

(Continued From First Page.)

and local authorities in adopting the most successful means of conserving coal. I expect some competing restrictions to be ordered following the Washington conference to-day. It is on the basis of these that we will adopt any future course."

Mr. Nixon said that there were several means by which coal consumption could be reduced here. These include cutting off of heat in subway, elevated and surface cars, ordered yesterday; reduction of the lighting in cars and stations, reduction of gas consumption for cooking, reduction of fighting in hotels and residences, reduction of street lighting, and reduction of service on the railroads. Engineers of the Public Service Commission are working out details under each of these heads in order to be able to put them into effect at the shortest notice.

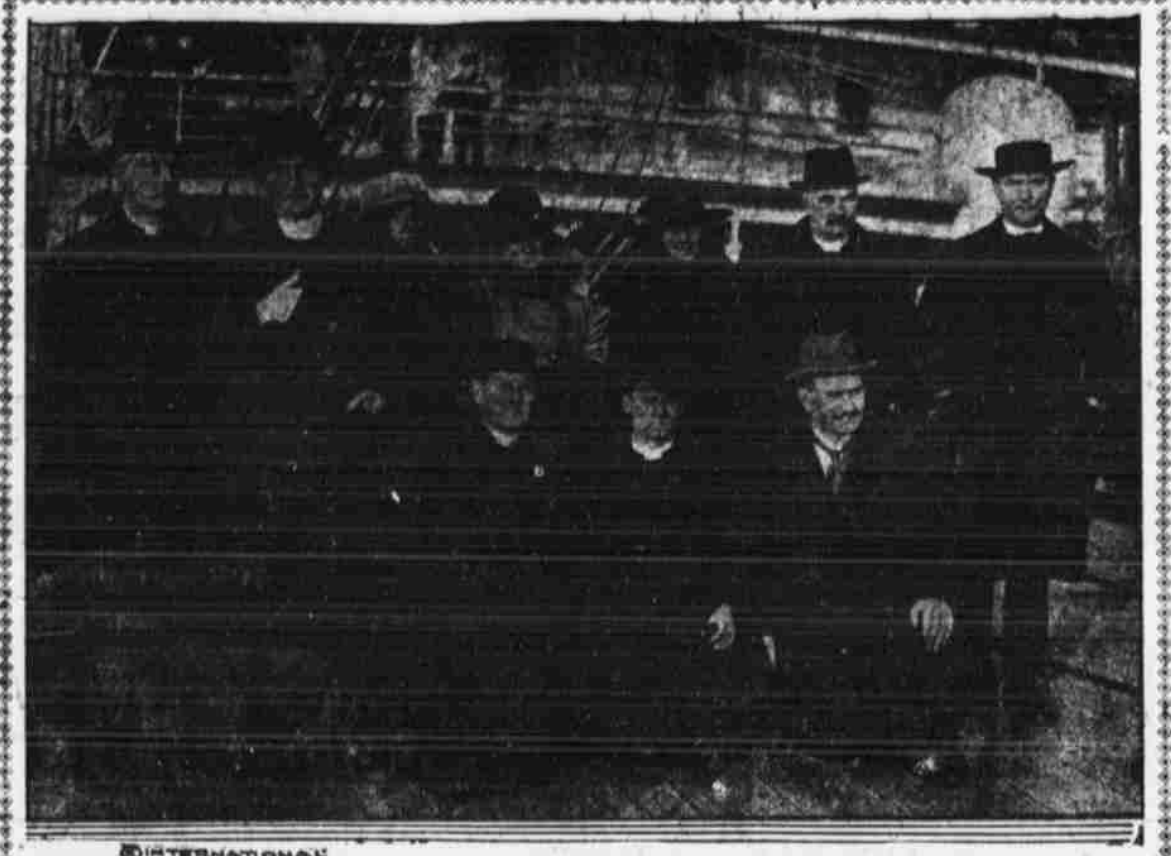

Inspectors turning in reports to the Commissioner this morning said that there had not been any murmuring on the part of the public because the heat was cut off in the cars.

All the surface, subway and elevated cars in Manhattan were heaped during the rush hours.

The order for heatless cars was not received by the B. R. T. management until after the morning rush, but it was to be acted upon his afternoon beginning at 4.30 o'clock and continuing until 7.30.

At 1 A. M. to-day the bunkering of foreign steamships was discontinued at this port and American ships can obtain fuel only on application to the coal committee of the Tidewater Coal Exchange. This order does not include passenger ships, but

WHAT STATES ARE DOING TO MEET FUEL SHORTAGE BY PRODUCING OWN COAL

Mines Seized by Two, Operation by Volunteers Begun in Third—Others Plan Early Action.

ACTIVITY by State governments to produce coal is increasing rapidly as hardships due to the strike of miners spread. Following is a summary of the steps taken:

KANSAS—Volunteers taking coal from strip pits in considerable quantities under State receivership of mines. State and Federal troops on duty.

MISSOURI—All coal mines seized by State under Governor's proclamation and operation by volunteers under protection of National Guardsmen to begin at once.

OKLAHOMA—Operation of mines begun by volunteers under protection of Federal troops. Gov. J. B. A. Robertson being among 500 coal diggers. Martial law declared in six counties producing coal.

ARKANSAS—Volunteers called for by Governor and operation of mines promised by Monday.

TENNESSEE—State to attempt mine operation if conference of operators and miners called for to-morrow fails.

MONTANA—State operation planned as soon as volunteers can be enrolled.

OHIO—Operators and miners in session with Gov. Cox in effort to end the strike which threatens to throw 750,000 persons out of work.

MICHIGAN—Gov. Sleeper attempting to settle strike temporarily on Garfield's terms, with agreement no coal shall be shipped out of State. Operators have accepted. Miners still considering proposal.

the number of such vessels under the American flag is almost negligible.

Officials of the Tidewater Exchange expect there will be a saving of about 20,000 tons of coal a day under the new order. The order may affect the sailing of the Imperator. Unless she has sufficient coal in her bunkers or her slips she will not be able to sail. She is scheduled to sail Dec. 10.

Beginning to-night, by volunteer agreement, display electric signs outside all theatres and motion picture houses will be discontinued except between 7.30 and 8.30 P. M.

The Shuberts started in last night. Public Service corporations, theatrical interests and business men are uniting in the move to conserve fuel and the Merchants' Association of New York sent a joint letter to Federal Fuel Administrator Garfield and Gov. Smith to-day asking information as to the exact measures desired by the Government.

It is estimated the cutting off of heat on transit lines and the reduction of electric signs will save about 1,000 tons of coal a day.

W. S. Mendel, general manager for the receiver of the B. R. T., said to-day the company had coal enough to last three or four weeks and that the rush hour saving on heatless cars would be about 100 tons a day.

The Brooklyn Union Gas Company officials said the company would continue to make as much gas as the public demands, but they expect the demand to diminish as a result of the appeal to the public to use as little as possible.

Fewer than 1 per cent. of the factories in Brooklyn are said to face any immediate prospect of a coal shortage. Others have perhaps a thirty-day supply.

Instructions directing the prosecution of manufacturers and dealers in fuel oil found to be taking advantage of the coal shortage unduly to raise the price of oil were received from Attorney General Palmer to-day by

PACKERS TO GET COAL, BUT ALL BY-PRODUCT PLANTS ARE SHUT DOWN

Chicago Quiet as on Sunday Under Fuel Restrictions—Big Cut in Train Service Monday.

CHICAGO, Dec. 5.—T. W. Proctor, Regional Coal Director, to-day announced that fuel will continue to be furnished meat packers in Chicago and the West and Northwest to operate slaughtering, refrigerating and packing plants. Use of coal for the manufacturing of any by-products is prohibited, and as a result all the packers' soap, glue and leather plants were closed.

The Chicago packers reported to-day that they had no surplus supply of coal on hand.

Chicago needs 500 cars of coal daily to continue on its present 61-2-hour business day basis. Hundreds of additional manufacturing plants closed to-day because of their inability to obtain fuel and many more thousands of men are idle. The fuel regulations are being rigidly enforced and as a result the loop district was as quiet as on Sunday.

Effective at 12:01 Monday morning, the most sweeping reduction of railroad service in history—reduction in passenger service of one-third, in "train miles" on all railroads diverging West, Southwest and Northwest from Chicago—had been ordered. Regional directors of the Central, Western, Southwestern and Northwestern regions estimated that that step alone would save 11,000 tons of coal daily. Other curtailments of railroad service were being considered to-day.

A small addition to the net production of coal was looked for from the Kansas and Oklahoma mines, being operated by volunteers, and from those in Missouri seized by the State.

Portions of Wyoming and Nebraska still were without promise of immediate relief to-day.

In Texas municipal officers were busy rounding up available stocks of wood and other fuel. At Dallas the situation was temporarily relieved by the purchase of 1,100 tons of cordwood for immediate distribution.

Warmer weather during the last twenty-four hours had helped to relieve the situation somewhat in many localities.

U. S. GETTING EVIDENCE IN COAL PLOT INQUIRY; NATION-WIDE IN SCOPE

Grand Jury Plans Full Investigation of Charges Operators and Miners Are in League.

INDIANAPOLIS, Dec. 5.—Government agencies in Indianapolis to-day continued collection and compilation of evidence of alleged collusion between coal miners and operators to limit production of coal, for presentation to the Federal Grand Jury when it convenes here next Monday.

A special session of the Grand Jury was called by United States District Judge A. B. Anderson yesterday and instructions to attorneys for the Government in an investigation nation-wide in its extent will be conducted.

It is declared by United States District Attorney L. Ert Black and Dan W. Simma, special district attorney appointed in connection with the Government's injunction proceedings, that they have evidence that the operators not only are in league with the miners in the present strike, but that they have formed a com-

bination of their own in violation of the Lever fuel control act and anti-trust laws.

The investigation begun by the Government follows closely the institution of proceedings charging eighty-four officials of the United Mine Workers of America with criminal contempt for alleged violation of the Federal Court injunction against the strike. It is the first time the operators have been under fire since the strike was called Nov. 1, but in view of reports received from time to time was not unexpected.

P. H. Penna of Terre Haute, Secretary Treasurer of the Indiana Bituminous Coal Operators' Association, to-day issued a statement in which he said:

"The coal operators of Indiana have no reason under the sun to fear any kind of an investigation of their activities that the Government desires to make. In making this investigation the Federal authorities will be given every assistance and every facility that we can give them."

The United States Government is setting out to do in my case just what the Governments of the Czars did—and you saw what happened there. Sending us abroad will not change economic conditions or still the spirit of unrest."

ANTI-SINN FEIN MISSION ARRIVES; TO TOUR COUNTRY

Six Protestant Ministers and One Unionist M. P. to Tell "Truth About Ireland."

Seven members of the Ulster Unionist Council arrived here from London yesterday on the steamship Columbia to combat the preaching of Sinn Fein in this country. Six of them are Protestant clergymen in the North of Ireland and the other a member of Parliament, William Coote, from South Tyrone.

The methods of the Sinn Fein in this country were likened to those of the Bolsheviks by the members of the mission. They stated they had come to this country representing the best interests of Ireland and to counteract the efforts of the Sinn Fein to establish a republic in Ireland, which they said would only bring disaster.

They made it plain that they stood for union with the British Empire.

"We are for justice and fair play," said the Rev. William Corkey of the Townsend Presbyterian Church, Belfast, who brought his wife and sister-in-law with him. "There are two nations in Ireland. We have come to represent the one that stood by America in the war—the one which never insulted the American flag and always welcomed America's soldiers."

And the others nodded their approval of his remarks. They are the Rev. A. Wiley Blue of the May Street

OKLAHOMA COAL REGION PUT UNDER MARTIAL LAW

M'ALESTER, Okla., Dec. 5.—Gov. Robertson to-day issued a proclamation declaring martial law in Pittsburg, Latimer, LeFlore, Coal, Haskell and Okmulgee Counties to take effect immediately.

The proclamation sets forth that martial law was necessary "to quell hostile outbreaks against the public peace, to secure coal for fuel purposes, prevent sabotage and criminal syndicalism and restore the mining section to its normal condition."

The Board of Education, the Board of Estimate to-day transferred \$310,000 from the Education Department's fund in order to pay the salaries of school janitors for November and December. The shortage was due to an 18 per cent. pay increase granted last year by the Board of Estimate.

President Pratt said he warned Comptroller Craig at the time the increase was granted that that would be no funds at the end of the year to meet the rate. Yesterday the janitors notified President Pratt that unless provision was made to-day for their pay, they would strike.

Presbyterian Church, Belfast; the Rev. Louis Crooks, Episcopalian; the Rev. E. H. Harris, rector of the Irish Methodist Church, Donegal Square, Belfast; the Rev. E. Wesley Maguire, Methodist; and the Rev. Edward H. Telford, Methodist, who also was accompanied by his wife. The Rev. A. Wiley Blue is the only one who has been in this country before. After they landed, Mr. Coote gave out a typewritten statement, which said in part:

"We are not here on a financial

campaign. Money is not our object. We are not here on a political campaign for Americans and British politics. We are here to tell the truth about Ireland. We are interested in law and order, of truth and honesty, of fair play and principle, to protest against the pernicious propaganda which is being spread in your country in relation to Ireland.

"Our mission is not sectarian. We raise no religious issue. Our mission is to tell the truth about Ireland. We are interested in law and order, of truth and honesty, of fair play and principle, to protest against the pernicious propaganda which is being spread in your country in relation to Ireland.

"We wish to point out to the people of America that its terms are misleading. Naturally in America you would favor a republican form of government. The Sinn Fein calls itself a republic. Therein lies the danger. It is a movement akin to the Bolshevik in Russia. Their methods are alike."

A committee from the Society for American and British Friendship, headed by the Rev. D. D. Irvine and including many ministers, among them the Rev. Dr. T. C. Johnson of the Cathedral of St. John the Divine, who represented Bishop Burch, met the mission at the pier. There will be a meeting at the Presbyterian House, No. 156 Fifth Avenue, to-morrow to map a speaking tour of the country for the members of the mission. They went to the Hotel Commodore.

PENNY A POUND PROFIT

Christmas Candy

For Churches, Sunday Schools, Institutions, Etc.

Our Famous Mixed Candies in 30 Pound Cases. With or Without Folding Boxes.

EARLY SHOPPING IS URGENTLY SUGGESTED.

Who knows but that Christmas Eve may be wet and stormy? Even without this drawback, the acute shortage of Sugar and the tremendous demand that will be made for Holiday Sweets may compel you to do without your favorite goodies for Christmas. SHOP EARLY AND AVOID THE LAST MINUTE HOLIDAY RUSH!

FUNERAL DIRECTORS.

FALLING TWILIGHT

By DR. BERTHOLD A. BAER.

While living in Philadelphia I knew more about the City of New York than the average New Yorker. At the same time I knew less about Philadelphia than the average Philadelphian.

Quite natural; there will always be time to see the home town, one thinks; let us first see the world. This reminds me of a man who wanted fishing worms. He walked miles and miles to the fields. When he came home his little boy had dug up a can full out of the back yard.

Thus I happened to know years ago more about The Funeral Church, and its founder-proprietor, Frank E. Campbell, than the average New Yorker knows today.

"Before we make up our minds how to steer from day to day, we must know where we are going," says Henry Van Dyke.

In the knowing lies the beauty of life. Today's success is the result of yesterday's preparation.

Two women inspired this article—two women who, though having lived miles apart, had died as one in mind.

"Mother's explicit wish was to be buried by Frank E. Campbell, from The Funeral Church, Broadway at 66th Street," said her daughter.

"Mother directed in her will to be buried from The Funeral Church by Frank E. Campbell," said the son, a lawyer.

This gives rise to another thought: You make a will; you buy a burial plot; you erect a tombstone—why not complete your life's work by stating in your will that you want Frank E. Campbell to perform the last loving act of kindness, well knowing that his ability to make the funeral arrangements the proper closing chapter of a successful life has been responsible for many letters full of gratitude and appreciation.

"Good resolutions seldom fail to produce some good effects on the mind from which they spring," says Charles Dickens.

Why not resolve today to visit The Funeral Church and prepare for the falling twilight in the happy days of sunshine?

ISN'T it evident that a shop which, all the year 'round, is the authority on gifts and giving can give you the greatest help in the pleasant task of selecting Christmas Gifts?
